

## Extra Models Folder in asset :

This folder contains extra lowpoly models and 2 procedural materials for the user to use them in their projects . It contains :

- Meshes : Extra models meshes
- Materials : Extra models materials
- Textures : Extra models textures
- Prefabs : Extra models standard prefabs
- Procedural Materials : 2 procedural usable materials

## Using Procedural materials :

For using procedural materials in “ Extra Folder” you need to download and import a third party plugin called “Substance in Unity” which is a free plugin and after importing that you can use them .
